

ATTENTION: Healthcare Providers

- **Avoid restraints** • Avoid the use of **medications listed below**
- **Administer RLS medications only as prescribed** by patient's physician

Dopamine-antagonist agents, as well as the following medications, may cause significant worsening of RLS, administer with extreme caution:

Antinauseates – Antivert, Atarax, Benadryl, Bonine, Compazine, Phenergan, Reglan, Thorazine, Tigan, Trilafon

Safe alternatives: Kytril, Transderm Scop patch (for seasickness), Vistaril, Zofran

Antipsychotics – Haldol, Loxitane, Mellaril, Moban, Navane, Prolixin, Serentil, Seroquel, Stelazine, Thorazine, Vesperin

Atypical Neuroleptics – Clozaril, Risperdal, Seroquel, Zyprexa

Safe Alternative: Abilify (possibly)

Antidepressants – ALL can cause RLS worsening

Safe alternatives: Nefazodone (may cause liver failure), Trazodone, Wellbutrin, Lamotrigine, Depakote, carbamazepine, oxcarbazepine (used as “mood stabilizers”)

Antihistamines – All sedating antihistamines (especially those containing diphenhydramine): Benadryl & OTC combination cold/sinus/cough medications, Actifed, Advil PM, Bayer PM, Comtrex, Contact, Dimetapp, TheraFlu, Triaminic, Tylenol PM, Vicks Cough and Cold Products

Safe alternatives: Allegra, Clarinex, Claritin, Zyrtec (usually)

Sleep Aids – Silenor, all OTC sleeping pills containing diphenhydramine or doxylamine, Advil PM, Bayer PM, Excedrin PM, Somnex, Tylenol PM, Unisom

Safe alternatives: Ambien, Lunesta, Sonata, Suvorexant

MEDICAL ALERT CARD

I, _____,
have **Restless Legs Syndrome** ("RLS"), a chronic neurological condition that causes extreme and unbearable discomfort in my legs associated with an overwhelming and, at times, uncontrollable urge to move the legs. Please be alert that if I am immobilized, sedated, or coming out of anesthesia my symptoms can worsen and my legs and body can jerk uncontrollably. As moving the legs may be the only thing that will relieve the symptoms, I will make a desperate effort to get up to move, even if I am not fully aware of it.

PRESCRIPTION *medications I take regularly to manage my RLS:*
